

Features

- Enhanced aesthetics and compact design
- Conventional resettable MCP
- Clearly visible alarm signal indication
- Anti-tamper facility
- Easy installation and maintenance
- Transparent plastic cover

Description

The MCP-100 is a modern stylish manual call point designed to provide manual fire reporting.

The low profile design provides aesthetic appeal that allows it to blend in with today's modern architectural styles. The MCP-100 is ideal where emergency situations are identified and require an immediate evacuation.

The MCP-100 offers improved features for both the end user and the installer. A single maintenance tool provides access to test, reset and release the lid to change the glass or reset the element. The MCP-100 is fully compatible with all conventional systems available on the market.

The MCP-100 may be installed as a surface mounted device in a normal internal environment. It is not intended for use in an externally exposed or hazardous location.

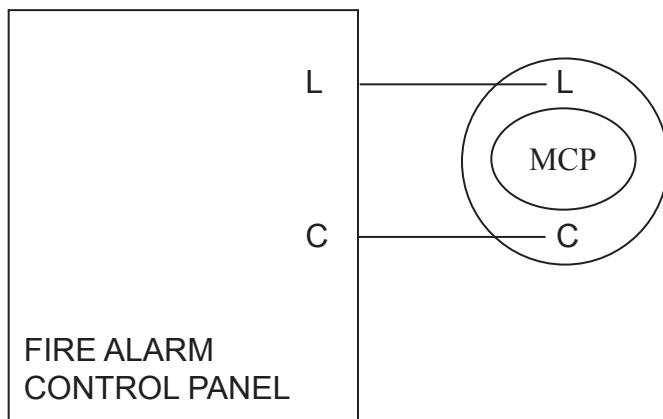

Specifications

Terminal Block Rating:
300V 10A(IEC 380V 16A) PITCH: 5.08mm
Insulation Withstands Voltage
AC 1500 V/MIN
Insulation Resistance
500MΩ or more at DC500V
Operating Temperature Range
-20°C to +50°C

Suitable Electric Wire
AWG 22~14 (IEC 1.5mm ²)
IP Rating
Suitable for Internal Use
Material
ABS Plastic
