## Wall and Ceiling Notification Appliances

## This manual applies to the following models

Horn only
FH-400-WW and FH-400-RR - wall and ceiling mounted horn Strobe only
FS-400-WW and FS-400-RR - wall mounted strobe
FS-400C-WW and FS-400C-RR - ceiling mounted strobe

## General Specifications

Horn and strobe
FHS-400-WW and FHS-400-RR - wall mounted horn and strobe
FHS-400C-WW and FHS-400C-RR - ceiling mounted horn and strobe
Note: WW indicates a white unit and RR indicates a red unit.

| Operating temperature: | $0^{\circ} \mathrm{C}$ to $50^{\circ} \mathrm{C}\left(32^{\circ} \mathrm{F}\right.$ to $\left.122^{\circ} \mathrm{F}\right)$ |
| :--- | :--- |
| Humidity range: | $0 \%$ to $93 \%$ |
| Strobe flash rate: | 1 Hz |
| Nominal Voltage: | Regulated 24 VDC / 24 VFWR |
| Operating Voltage Range (RMS): | $16-33$ VDC / VFWR |
| Input terminal wire gauge: | 22 AWG to 12 AWG |
| Installation environment: | For indoor use only |

## Caution

Do not change factory applied finishes.

## Dimensions for all Models

Height and width (all models)

The kit includes

Mounting plate with screws, shorting clip, and protective cover

Dimensions of the Optional Mounting Box (BB-400R/W)

Knockout dimensions: 1 1/16" (27 mm)

## Setting the Candela (FS-400, FS-400C, FHS-400, FHS-400C only)

The candela can be set to $15,30,75,15 / 75,110$ and 185 (for FS-400 and FHS-400). The factory default setting is 15 .
Note: The 185 candela setting is not available on ceiling units.

1. Remove the plastic selector tab from the back of the device.
2. Re-insert the selector tab into the notch that is labeled with the desired candela setting.

## Setting the DIP Switches

Note: DIP switches 2 and 3 are not used.

Switch 1: Input

| DIP Switch 1 |  |
| :--- | :--- |
| ON | OFF |
| Regulated 24 <br> VDC/FWR (Non- <br> synchronized) | Synchronized <br> (default) |

## Note: Use Non-synchronized

 when the appliances do not need to be synchronized. Use Synchronized when synchronization is required, either through a sync module or built-in synchronization on the control unit.
## Switches 4 and 5: Signal Rate

| Signal Rate | DIP Switch 4 | DIP Switch 5 |
| :--- | :--- | :--- |
| Continuous | OFF | OFF |
| March | ON | OFF |
| Temporal (default) | ON | ON |
| 20 BPM | OFF | ON |

## Switch 6: Horn volume

| DIP Switch 6 |  |
| :--- | :--- |
| ON | OFF |
| High (default) | Low |

DIP switches for setting options

## Shorting Clip

In order to test the wiring, place the shorting clip on the middle two terminals after wiring.

Remove the shorting clip before mounting the device.

## Wiring

Use the information in this document to determine the total current draw of the devices. The total current draw of the devices must not exceed the power supply of the panel. In all cases, the installer should consider the voltage drop to ensure that the last device on the circuit operates within its rated voltage.
The absolute maximum number of devices on one circuit is 100 . The absolute maximum impedance for wall mounted devices at 15 candela is 150 ohms.

Input terminal wire gauge: 22 AWG to 12 AWG
Note: Wiring must be in accordance with CSA C22.1, Canadian Electrical Code, Part I, Safety Standard for Electrical Installations, Section 32 and NFPA 70.

Mounting to the Wall or Ceiling
MGC recommends spacing notification appliances in compliance with CAN/ULC S524 and NFPA 72.
Mount the unit with the MGC logo at the top. The mounting plate is compatible with 3 " by 2 " single gang device boxes, $3-3 / 4$ " by 4 " double gang boxes, 4 " by 2 " single gang utility boxes, standard 4 " by 4 " boxes, and standard 4 " octagon boxes. See below for a description of the holes to use for each box.

Attach the mounting plate to the box with 2 or 4 screws.

3

Secure the unit with the \#4-40 x 3/8" screw and snap the nameplate over the screw.

## Mounting to the Optional Mounting Box (BB-400R/W)

MGC recommends spacing notification appliances in compliance with CAN/ULC S524 and NFPA 72. Mount the unit with the MGC logo at the top.

## Unmounting

Remove the nameplate and the screw.

Insert a screwdriver into the slot at the top of the unit and turn it to separate the unit from the mounting plate.

## Mounting Options

A: 3" by 2" single gang device box
B: 3 3/4" by 4" double gang box
C: 4" by 2 " single gang utility box
D: standard 4" by 4" box
E: standard 4" octagon box

Operating RMS Currents (mA)
FS-400 Strobe Operating RMS Currents (mA)

## Limitations

These devices cannot operate on coded power supplies.

## Disclaimer of Warranties and Limitation of Remedies and Liability

MGC Systems Corp. ("MGC" or the "Company") makes no warranty of merchantability or fitness for a particular purpose with respect to its goods, nor is there any other warranty, expressed or implied, except for the warranty contained herein and in MGC's standard terms of sale. All previous warranties are expressly revoked and no derivation or alteration, verbal or written, is authorized.

MGC's sole and exclusive obligation is to repair or replace, at its option, any part which is deemed by MGC to be defective in materials or workmanship under normal use and service, for a period of 12 months from the date of purchase, but not to exceed 18 months after shipment. MGC's warranty shall be voided if the product is altered or serviced by a non-authorized party. MGC does not represent that its products will prevent loss by fire or otherwise, or that its products will in all cases provide the protection for which its products are installed or intended. Buyer and end-users acknowledge that MGC is not an insurer and assumes no risk for loss or damage, other than as expressly agreed to by MGC in its warranty.

Under no circumstances shall MGC's liability, under warranty or otherwise, exceed the contract price for the goods for which liability is claimed, and in no event shall the Company be liable to the purchaser or any other third party for (a) consequential, collateral, incidental or special damages, including, without limiting the generality of the foregoing, loss of profits, loss of the product or any associated equipment, cost of capital, cost of substitute or replacement equipment, facilities or services, down time, purchaser's time, labor back charges, the claims of third parties, including customers, and injury to property or other incidental costs incurred by purchaser or any third party, or (b) direct damages (other than direct damages as expressly specified above).
