***NEW FOM-2000-UM SINGLE-MODE or MULTI-MODE FIBER MODULE

We are pleased to announce the launch of the new FOM-2000-UM Single-Mode or Multi-Mode Fiber-Module.

The FOM-2000-UM is compatible with LC Duplex terminated fiber pairs or patch cords. Installation in a Flex-Net or MMX network requires the FNC-2000 network interface controller but no system configuration or change or special firmware.

Plug-in optical modules allow for cost-effective network configurations made of fiber only or a mix of wires, single-mode fibers and multi-mode fibers. Single mode fiber links can be up to 10 km in length and multi-mode links can be up to 1.5 km.

This item is a B coded item in the US and Canada and currently stocked in the warehouse.

Ordering Information

Model	Description
FOM-2000-UM	Allows for single-mode or multi-mode fibre optic communication on a Flex-Net network. Add FOM-CONN-SM and FOM-CONN-MM
FOM-CONN-SM	Fibre Optic Connector Single Mode (pack of 2). Must use a FOM-2000-UM
