

Welcome in

Offering smart access solutions that help improve operational efficiency, enhance security, enable easier deliveries and more for residential and commercial properties.

Available across North America and select countries in EMEA and APAC.

Everyone benefits from Amazon Key

It streamlines operations, makes access and package deliveries easy, and upgrades properties with amenities residents love.

Simple and convenient

Quick installation and an easy onboarding process ensure Amazon Key is up and running fast, and the Property Management Portal lets you manage property details online, all in one place.

Effortless deliveries

With Amazon Key, drivers are able to deliver packages safely inside without assistance from staff or residents, helping to reduce missing deliveries and packages left outside the property.

Smart and secure

Multi-factor authentication verifies delivery drivers in real time, so only those with packages for your property are able to receive access using Amazon Key.

**Developed by two of the world's most trusted brands,
Amazon and Ring, Amazon Key offers innovative,
smart access solutions for:**

- ✓ Multi-family residential buildings
- ✓ Gated communities
- ✓ Single family homes
- ✓ Commercial businesses
- ✓ College and university campuses

**Amazon Key technology is compatible with over
95% of secure access systems, including:**

Motorized gates
and doors

Coded gates

Remote openers

Fob readers

**Amazon Key is installed in >50% of multi-unit buildings in
North America with secure access systems.**
