SUBSCRIPTION BASED SERVICES

Mᵢconnect

Mircom®

MiConnect

The MiConnect portal is Mircom's online center for the management, monitoring and configuration of its online services.

The portal is built for the use of Mircom dealers and their customers such as the property managers and commercial building/office administrators.

The MiConnect portal will serve as a SaaS (Software as a Service) to its customers. Below you will see the list of the services you can benefit from through MiConnect.

Manage Your Mircom Devices, Buildings and Residents!

MiEntry (Mobile Application)

The MiEntry mobile app is designed to simplify the controlled access to residential and commercial buildings. MiEntry allows residents to verify the identity of their guests with live video and audio. The app lets residents use their smart phones as credentials via BLE (Bluetooth low energy) to enter the building. (Coming soon)

The app requires the MiSIP services to receive calls from the lobby panels. Please call or create a MiConnect login for pricing.

- Available for both iOS and Android devices
- Compatible with the TX3 TOUCH (15", 22" and Weather Resistant) and TX3 Nano
- Engineered to use minimal mobile data
- Uses SIP for communication
- Shows all missed and received calls
- User-friendly interface
- Capable of placing a direct call to TX3-NANO-S4
- BLE ready with future credential licensing via MiConnect (*Coming Soon*)

MiSIP

Mircom is offering its own SIP service for our customers. The SIP service supports audio/video calls and push notifications. Mircom has two SIP services for two different applications. Those services are MiSIP4PSTN and MiSIP4MiEntry.

SIP (Session Initiation Protocol) is a protocol that controls multimedia messaging on an IP network. TX3 voice entry products use SIP for IP telephony. To make audio and video calls using SIP, you need at least 2 SIP clients and a SIP server.

MiSIP4 MiEntry

SIP4MiEntry is the most reliable SIP service for the MiEntry application.

It supports both audio and video communication as well as push notifications.

The MiConnect portal allows creation, cancellations and suspension of the MiEntry users.

Mircom is offering 2 plans: basic & premium to accommodate any type of project.

Contact your sales representative for pricing.

MiSIP4PSTN

Voice Access systems can be fitted with a VoIP adapter (ATA) to provide the voice communications from the Voice Access system to any cellular, home or business phone. The adapter comes complete, resulting in a quick installation and setup.

The VoIP adapter (ATA) only requires you to plug it into an IP Network with internet access. There is no manual setup. The VoIP adapter is simple plug and play device that automatically makes all the required connections. A Mircom MiSip subscription is required for activation.

- Retrofit to existing Mircom Voice Access system
- Retrofit existing non-Mircom Voice Access system
- Plug & Play setup
- Only requires a low bandwidth internet service
- Flat rate service
- No long-distance charges (USA & Canada Only)
- Easy installation

Mircom®
Safer • Smarter • More Livable Buildings

About the Mircom®

Founded in 1991, Mircom is a global designer, manufacturer and distributor of Intelligent Building Solutions. Reaching customers in over 100 countries worldwide, Mircom's portfolio includes: fire detection & alarm, communications & security, mass notification, nurse call, and building automation & smart technologies. Mircom's vision is to make buildings worldwide safer, smarter, and more livable.

Our global network of dedicated Sales and Service Offices, known as Mircom Engineered Systems, allows us to be a full solution provider. Through Mircom ES, we're able to provide and fully service our line-up of innovative and advanced solutions which are scalable to satisfy diverse user demands, from small & mid-size buildings to the world's most complex applications.
