

Features

- High impact, UV stabilized, thermoplastic construction
- Low profile, twin lamp configuration
- Universal spider knockout pattern and keyhole mounting slots stamped into back of cabinet
- 120/347VAC 60Hz Input, field selectable
- White colour is standard

Description

The Mircom MHE2-06030 series is a slim line decorative emergency light which will fit well in any commercial application. The MHE2-06030 comes with two wedge base, integral lamps which will provide uniform lighting in the event of a power outage. Contact factory for optional lamps. The housing and lenses are made of impact, heat and scratch resistant, UV stabilized thermoplastic. Mounting is made easy with the universal mounting plate in the back, and conduit knockouts on the sides of the unit.

The MHE2-06030 unit is a completely self-contained emergency light which is made for use on 120 or 347 volt circuits. A 6V maintenance free, sealed lead acid battery is included with the MHE2-06030, which will provide 30 watts for 30 minutes of emergency lighting. The universal mounting plate is made to fit over a standard octagon box for simple, low cost installation. Once the plate is pre-mounted and all wiring connections terminated, the unit is snapped onto the plate, completing installation. White finish is standard.

The Mircom MHE2-06030 emergency lighting units come complete with high quality, pulse action chargers which are up to 70% more efficient than constant voltage chargers. The chargers are solid state and are complete with low voltage disconnect, brownout, and short circuit protections. A LED display indicates AC-ON status and all chargers are complete with a quick test, push-button switch for easy maintenance and testing. Recharge time is 24 hours.
