

Features

- High impact, UV stabilized, thermoplastic construction
- Low profile, canopy type design with extremely small total footprint
- Universal spider knockout pattern and keyhole mounting slots stamped into back of cabinet
- 120/347VAC 60Hz Input, field selectable
- White colour is standard,

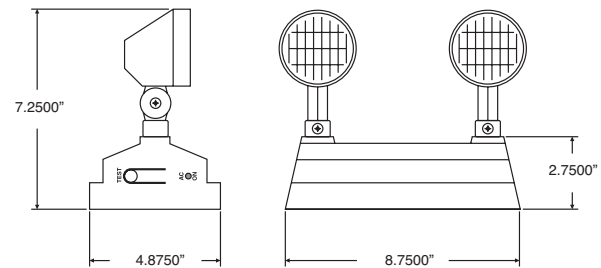

Description

The MHG2-06030/09 series from Mircom provides a compact and economical solution to suit a variety of emergency lighting needs. The entire unit has been designed to install quickly and easily to electrical junction boxes (not supplied) by utilizing a snap-on base plate. The MHG2-06030/09 is a stand alone unit available in 6V capable of providing up to 30W of emergency power for 30 minutes duration. A variety of head and lamp combinations can be fitted to the unit to suit specific requirements.

The MHG2-06030/09 unit is a completely self-contained emergency light, made for use on 120 or 347 volt circuits. The housing is made of durable, UV stabilized thermoplastic. A maintenance free, sealed lead acid battery is included with the unit which will provide the specified wattage for 30 minutes duration. All snap-on base plates are complete with a universal knockout pattern. Once the plate is pre-mounted and all wiring connections terminated, the unit is snapped onto the plate, completing installation. White finish is standard.

The Mircom MHG2-06030/09 units come complete with high quality chargers. The chargers are solid state and are complete with low voltage disconnect, brownout, and short circuit protections. Standard dual input of either 120VAC or 347VAC is field selectable. An LED display indicates AC-ON, and all chargers are complete with a quick test, push-button switch for easy maintenance and testing. Recharge time is 24 hours.
