Description

The ceiling speaker SPP-104 and speaker strobe SPPS-104 Series offer an audible/visual solution that delivers exceptional energy efficiency in a compact design.

Utilizing advanced LED technology, SPPS-104 Series provides a much lower current draw than xenon bulb technology. This in turn allows for more devices on a notification appliance circuit while reducing the number of external power supplies required.

The SPPS-104 speaker strobe and the SPP-104 speaker are designed to meet UL1480, UL1638 / ULC S541, ULC S526 requirements for visual and audible notification appliance.

Mircom's Notification Appliances comply with all agency requirements including the 2016 edition of NFPA 72.

Features

- Advanced LED technology provides superior current draw performance.
- Speaker only or Speaker Strobe options
- Speaker power setting: ¼, ½, 1, 2 W
- Field selectable candela settings for SPPS-104-25/70 models: 15, 30, 75, 110, 125, 15/75 cd
- High candela option for flexibility
- Field selectable candela settings for SPPS-104-25/70H (High Candela) models: 50, 75, 90, 130, 185, 15/75 cd
- Built-in Synchronization
- Spacer (SPKC-W) option for retrofit applications where ceiling back box space is limited.

Benefits

Energy Efficient: Lowest current draw in the market (33mA at 15cd) Allows for a higher capacity of notification devices per circuit and eases external power supply requirements.

Flexibility: Multiple language plastic inserts included with speaker strobes (English/French/ Spanish)

Simple: Trim plate/adaptor kit allows for standard 4" back box use in retrofit applications

Specifications

Operating temperature	0°C to 50°C (32°F to 122°F)
Humidity range	0% to 93%
Strobe flash rate	1 Hz (1 flash per sec.)
Nominal strobe voltage	Regulated 24VDC/VFWR
Operating voltage range	16-33 VDC/VFWR
Nominal speaker voltage	25V or 70.7Vrms
Speaker Size	4"
Power Setting	¼, ½, 1, 2 W
Speaker Frequency Range	400 -4000 Hz
Terminal wire gauge	12-22 AWG
