

Description

Digital Audio Upgrade for QBB-5001

The RETRO-QBB-5001 adapter module provides a direct upgrade path for existing QBB-5001 analog panels, enabling seamless integration with the 6000 Series Digital Audio platform without major hardware replacement.

Maintain your installed QBB-5001 system while modernizing its audio capabilities. This retrofit solution minimizes disruption and reduces the need for costly panel replacements or field rewiring.

Features

Enhanced 6000 Series Audio Performance

Gain access to advanced digital audio capabilities, including:

- Up to 2000 ft. between expansion cabinets
- 400W per main node and 575W per expansion enclosure
- Support for up to 9 expansion cabinets (up to 575W total per node)
- Built-in Class A speaker circuits
- 24/7 external auxiliary audio capability

Simplified Installation

- Pre-wire directly to the card cage without requiring an amplifier. The slide-in terminal design streamlines installation and reduces commissioning time.

Cost-Effective System Modernization

- Upgrade to high-performance digital audio while preserving your QBB-5001 panel investment and maintaining system continuity.
