**Description**

Mircom's TX3-CSK-2 and TX3-CSM-2P comprises of mobile-ready contactless smartcard access control ID solution. Based upon the proven LEGIC® contactless digital radio frequency identification (RFID) platform, Our readers interface with a wide range of electronic access control systems by complying with the legacy Wiegand. In addition to supporting mobile access credentials—using the Bluetooth Low Energy (BLE) feature of select smartphones—TX3 includes a range of traditional physical access credentials, such as ISO cards, and key tags. TX3's range of credentials support 26-Bit Wiegand format, as well as custom Wiegand, ABA Track II magnetic stripe and serial data formats. They employ value-add features, such as MAXSecure™, and advanced data protection, such as AES encryption. TX3 credentials can be ordered programmed to various formats in exact number sequence required.
