Description

Mircom's TX3-P500-HA sets the electronic security benchmark for 125-kHz proximity readers, cards, and tags. Based upon proven contactless digital radio frequency identification (RFID) technology, these readers interface with a wide range of electronic access control systems by complying with the Wiegand communication protocol. They can be ordered to support several proximity card and tag technologies. Additionally, TX3 cards and tags are passive devices, eliminate maintenance by requiring no battery, and can be ordered to support several proximity reader technologies.
