- Reporting available

Description

TX3 Configuration and Monitoring Utility is a powerful configuration and monitoring tool for both TX3 series Voice Entry and Card Access systems. It has an intuitive and simple interface which is compatible with Windows 7, 8 and 10. A USB A to B cable is provided with all control panels to connect using the configuration software to a PC. Users can also take advantage of remote programming and monitoring using optional modules (ie. IP, dial up modem, USB to Serial converter). Installers and Property Managers can do offline programming and just upload the configuration to the control panels when they visit the site in seconds. This way workers can improve the accuracy of the work and increase their productivity.
