

MiVoIP

A modern, cost-effective solution for streamlined building communications.

Description

Functioning just like a phone line, MiVoIP facilitates seamless audio communication between residents and visitors and enables residents to grant access to the building.

MiVoIP is designed to replace traditional phone lines in residential and commercial buildings, providing a more economical and efficient communication solution. By eliminating the need for outdated landline connections, MiVoIP greatly reduces costs while enhancing communication reliability.

MiVoIP service will need a VoIP adapter (ATA). This adapter ensures smooth voice communication from the voice access system to any cellular, home, or business phone. The adapter is designed for quick installation and setup, requiring no manual configuration.

Features

- **Simple Setup:** Quick installation and setup without the need for manual configuration. Just plug in and start communicating.
- **Flexible Compatibility:** Compatible with both Mircom and non-Mircom voice access systems.
- **Subscription-Based:** Requires a service subscription via MiConnect.
- **Low Bandwidth Needs:** Only a low-bandwidth internet connection is required to support the MiVoIP service.
- **No Long-Distance Charges:** Enjoy free calls across the USA and Canada, ensuring cost savings.
- **Easy Installation:** Designed for swift, user-friendly setup.

Getting Started

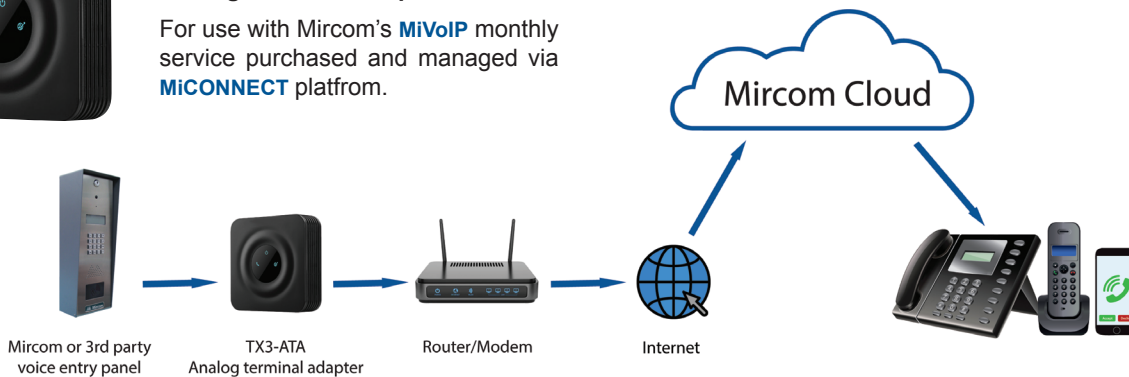

1. **Connect the Adapter (ATA):** Plug the VoIP adapter into your building's voice access system.
2. **Subscribe via MiConnect:** Activate your service to start enjoying the benefits of MiVoIP.
3. **Enjoy Seamless Communication:** Connect to any phone, anywhere, with crystal-clear audio quality and no long-distance charges within North America.

TX3-ATA

Analog Terminal Adapter

For use with Mircom's MiVoIP monthly service purchased and managed via MiCONNECT platform.
