# Ferrite Bead Installaiton Instructions

This instruction shows how to install a ferrite bead onto field wiring for building system equipment. Use the photo below to loop field wiring through the ferrite bead. Place a tie wrap in the position indicated to secure the bead in place. Tie wrap must pass throgh the wire loop and around wires leaving bead to be secure.

Tie Wrap

Wires To Panel Terminals

Wires To Peripheral Devices

NOTE:
1. If shielded cable is used, then the shield and shield drain wire must not pass through the bead.
2. See installation instructions or wiring diagrams for your equipment for specific wiring instructions.
3. Neatly dresss and secure all wiring. Adhere to all applicable electrical regulations.
