LT-6084 Installation of RB-FA1000MB

This document describes how to remove the old main board and install the replacement RB-FA1000MB.

Caution: To prevent damage to the boards, always hold them by the edges.

1. Power down the unit.

2. Disconnect the bridge, the resistor, and the ground wire from the board.

3. Remove the board.

4. Attach the replacement board to the chassis.

5. Connect the ground wire.

6. Connect the positive red bridge wire to BDG+ and connect the negative black bridge wire to BDG-.

7. Connect the resistor wires to P11 and P12.
