

Wiring

1. Connect TX3-WIEGAND-OUT to your card reader system as shown below.

The maximum distance from TX3-WIEGAND-OUT to the access control system is 500 feet using 18 AWG, and 250 feet using 22 AWG. Mircom recommends a foil shielded multiple conductor stranded cable, at least 22 AWG. For example, use Belden 9535 or a similar cable.
