MIRCOM & AMAZON KEY

Smart & Secure Package Delivery Access

Mircom is partnering with Amazon to offer smart access solutions that improve operational efficiency, enhance security, enable easier deliveries, and more for residential and commercial properties.

KEY BENEFITS

 Streamlined Deliveries Drivers get one-time building access via the Amazon cloud and deliver packages without needing to be buzzed in.	 More Accurate Deliveries Delivery accuracy increases, and drivers leave packages in the location that works best for you and your residents.
 Smart and Secure Multi-factor authentication via the Amazon cloud ensures delivery drivers are verified in real time.	 Free of Charge The Amazon Key device integrates with Mircom access control systems and is provided at no cost for eligible properties.

HOW IT WORKS

Mircom installs Amazon Key smart device that integrates your building's existing access system with the Amazon delivery app. Delivery drivers press the Amazon Key access button on their delivery app to gain authorized, time-limited building entry, and deliver packages to your desired location.

Step 1 Driver requests building access through the Amazon delivery app.	Step 2 Amazon confirms the driver's ID, route, and time of the request.	Step 3 Once verified, the driver receives time-limited access to the building.	Step 4 The driver delivers packages to your desired location and exits.
