

Clearing Event Logs

For the initial installation ensure that event logs are cleared. To clear event logs start from the Operation menu and follow the steps below.

1. In the Operation menu *Scroll DOWN*  to “2 Delete logs” and press *ENTER* .
2. In the Delete Logs menu *Scroll DOWN*  to “3 All Log(s)” and press *ENTER* .
3. When you see “Del All Log(s)? Y” press *ENTER*  again to confirm deletion. Press  to go back.

Setting the Date and Time

To set the date and time start from the Configuration menu and follow the steps below.

1. In the Configuration menu *Scroll DOWN*  to “5 Set time & date” and press *ENTER* .
2. Change the month using the *Scroll UP*  and *Scroll DOWN*  buttons. Use the *Scroll LEFT*  and *Scroll RIGHT*  buttons to move on to the next portion of the date once the month has been set.
3. Repeat the previous step to set the day, year, hour, minute and AM or PM.
4. Press *ENTER*  to confirm that the date and time have been set correctly. Press  to go back.

Line Types

The TX3 can connect to five different telephone lines. To configure each telephone line as either an autodialer controller (ADC), a no subscriber line (NSL), or not used, enter the Configuration menu and follow these steps.

1. In the Configuration menu ensure that “1 System Option” is highlighted and press *ENTER* .
2. *Scroll DOWN*  to “2 Line Type” and press *ENTER* .
3. In the Line Type menu *Scroll DOWN*  and *Scroll UP*  then press *ENTER*  to choose the line that requires configuring. By factory default “L-1 Type” is set to “ADC” and the rest are set to “not used”.
4. Navigate through the line type options by using *Scroll DOWN*  and *Scroll UP*  and select the appropriate line type (“ADC”, “NSL” or “not used”) by pressing  or . Press *ENTER*  to confirm your selection and to return to the previous menu. From here you can select a different line to set its type. Press  to go back.

Main and Auxiliary Door DTMF

The Main and Auxiliary Door Dual Tone Modulated Frequency (DTMF) or touch tone feature allows the resident to use their telephone touch tone keypad to open the main or auxiliary door. To set this up start from the Configuration menu and follow the steps below.

1. In the Configuration menu ensure that “1 System Option” is highlighted and press *ENTER* .
2. *Scroll DOWN*  to “3 Main door DTMF” or “4 Aux door DTMF” and press *ENTER* .

3. The factory default for the main door is the “9” key, the default for the auxiliary door is the “6” key. Browse using the *Scroll UP*  and *Scroll DOWN*  buttons to the desired key.
4. Once the desired key is highlighted press  or  to select it. Press *ENTER*  to confirm your selection and to return to the previous menu. Press  to go back.

Attention: Do not select the “4” key for either the main or auxiliary door. The “4” key is reserved to refuse entry and disconnect the call. Do not use the same number for the main door, auxiliary door, and call waiting (call waiting works on NSL systems only). If the Telephone Access System Panel has controller board model MD-1245, do not select 1, 7, or *. Ensure that the key used for the main door is different than the key used for the auxiliary door.

Door Timers

The door timers define the length of time the main and auxiliary door releases stay unlocked. To set these timers start from the Configuration menu and follow the steps below.

1. In the Configuration menu ensure that “1 System Option” is highlighted and press *ENTER* .
2. *Scroll DOWN*  to either “5 Main door timer” or “6 Aux door timer” and press *ENTER* .
3. The factory default for door timers is 30 seconds, change to the desired number of seconds by using the *Scroll UP*  and *Scroll DOWN*  buttons.
4. Press *ENTER*  to confirm the selection and return to the previous menu. Press  to go back.

Talk Timer

The talk timer defines the maximum length of time that a visitor speaks with a resident. To set this timer start from the Configuration menu and follow the steps below.

1. In the Configuration menu ensure that “1 System Option” is highlighted and press *ENTER* .
2. *Scroll DOWN* to “7 Talk Timer” as and press *ENTER* .
3. The factory default for the talk timer is 60 seconds, change to the desired number of seconds by using the *Scroll UP*  and *Scroll DOWN*  buttons.
4. Press *ENTER*  to confirm the selection and return to the previous menu. Press  to go back.

Speaker and Microphone Volume

The speaker and microphone volume settings determine how loud these devices are. The volume settings range from a value of 1 to 15. To set the volume levels start from the Configuration menu and follow the steps below.

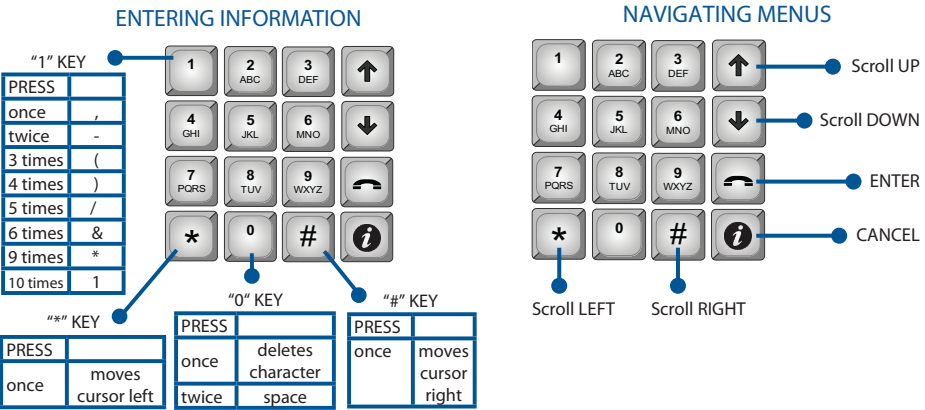

1. In the Configuration menu ensure that “1 System Option” is highlighted and press *ENTER* .
 2. *Scroll DOWN*  to “22 Speaker volume” or “23 Mic volume” and press *ENTER* .
 3. The factory default for the speaker volume is 11, the default for the microphone volume is 5. You can change each volume setting to the desired level by using the *Scroll UP*  and *Scroll DOWN*  buttons.
- Press *ENTER*  to confirm the selection and return to the previous menu. Press  to go back.

Add a New Record

From the Configuration screen follow these steps.

- 1. In the Configuration menu *Scroll DOWN* to “2 Database” and press *ENTER* .
- 2. In the Database menu ensure that “1 Add Record” is highlighted and press *ENTER* .
- 3. There are 5 or 6 different screens that prompt for information in order to create a record. Each screen is listed in order of appearance and explained in the table below. Screens marked with an asterisk in the table must be filled in. Use the keypad to input information and press *ENTER* to confirm your selection and proceed to the next screen. Press to go back.

Order of Appearance	Database Menu Display	Explanation/Description
1	Enter Apt# []	Enter the resident’s apartment number (up to 8 digits).
2*	Enter Dial Code []	Enter the resident’s 4 digit dial code. If all digits are not required put in leading zeros.
3*	Enter Resident Name []	Enter the resident’s name. The name must be unique and a maximum of 15 characters. See the figure titled “Entering Information”.
4*	Line in Use [x] Line 1 ... [] Line 5	Enter the speech path for resident to communicate to the ADC line or to a relay control unit. Line 1 is default. Scroll through using the arrow keys and make a selection using the star or pound key.
5* (ADC Only)	Enter Phone Number []	Enter the resident’s telephone number (up to 18 digits including commas or semi-colons that represent pauses). Use the up arrow key for a comma (1 second pause) and the down arrow key for a semi-colon (3 second pause).
5* (NSL Only)	Enter Relay Code []	Enter the resident’s assigned 4 digit relay code. Relay codes start at 1 for the first relay, up to 1535.
6 (NSL Only)	Ring Pattern [x] Ring Pattern 1 ... [] Ring Pattern 5	Enter the ring pattern for the resident. Scroll through using the arrow keys and make a selection using the star or pound key. The default ring pattern is Ring Pattern 1. Ring patterns are only used by NSL systems.
