

LT-9281 Installation Instructions for GK-025

For ideal sound quality on the TX3 Touch Screen, install the GK-025 foam gasket. The GK-025 helps ensure that the microphone is not blocked and doesn't accidentally become grounded on the touch screen chassis.

1. Open the TX3 Touchscreen chassis.
2. Remove the paper backing from **one** side of the GK-025 to expose the adhesive.
3. Place the exposed side of the GK-025 on the touchscreen chassis as shown in the following figure.
