[TX3] Series

VOICE ENTRY

TX3 Illuminated Directory Voice Access Systems

Simplifying Access Control

TX3 Illuminated Directory Voice Access Systems are ideal for resident and visitor access control for small buildings. They provide an easy to read illuminated directory for bulletins or signage, are very durable, and interface with other TX3 Platform solutions. You will also get free technical support and a 3 year warranty.

Universal Support – TX3 solutions integrate with CCTV, strobes and other devices. The LED Illuminated directory and the 16 button keypad make for easy viewing at night

Durable Design – Unlike other products on the market, TX3 solutions are crafted out of stainless steel and are vandal resistant, surface mount models are perfect for outdoor applications. They also provide flexible mounting options – surface, flush or gooseneck

Flexible Communication – TX3 solutions connect directly to other panels and can be networked using RS-485 and/or TCP/IP for easy remote programming and maintenance. A variety of protocols enable the user to easily and remotely manage the panel(s) through USB, modem or TCP/IP

Mircom™

Safer • Smarter • More Livable Buildings

Features

- Add TX3-IP module for TCP/IP networking
- Multi-lingual Display and Voice Greeting (English, French-Canadian and Spanish) that provides instructions on how to use entry panel
