

# UNIFIED BUILDING SOLUTION

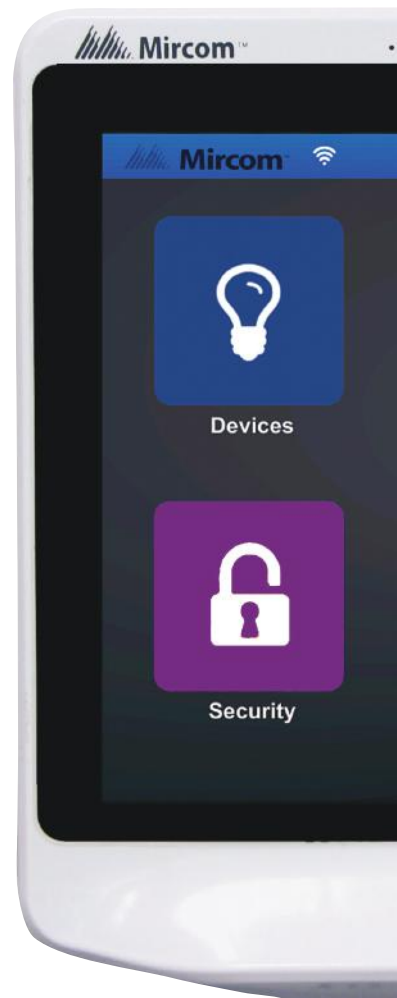

## TX3 InSuite™ Touch Gateway

The Intuitive TX3 InSuite Touch Gateway provides a built-in camera, speakers and microphone to allow two-way communication and camera viewing.

Mircom's TX3 InSuite Touch Gateway and Unified Building Solution combine to create a new platform for building and community services. This solution enhances user convenience, security, & safety in a gateway capable of future add-on technologies and benefits. The TX3 InSuite is 100% designed and built by Mircom in North America.

- Positive visual identification is provided by audio-video communication to each visitor before permitting access.
- Mass notification of building and community events can be conveniently sent to each occupant.
- A community watch program lets occupants view public cameras in their community.
- Full integration of the TX3 platform lets users unlock their suite door and the main entrances.
- Unique annunciation for fire and emergency events in the building.
- The inSuite supports a wide selection of ZigBee peripheral interfaces for home automation, security and life safety.
- Convenient PoE design reduces infrastructure costs and simplifies installation; one plug for both power and communication.
- SD/MMC card slot for media storage.
- 2 high quality stereo speakers for playing videos.
- 2nd Ethernet port for daisy chaining stations in the same room (e.g. party room or meeting room).
- 3 user configurable buttons.

## Two-Way Intercom

**Concierge**  
Speak directly with building management.

**Front Lobby**  
Screen visitors and grant access from the comfort of your suite.

**Suite to Suite**  
Talk with friends or family who also live in the building.

## View Security Cameras

**CONVENIENCE**  
Check the fitness center availability.

**SAFETY**  
Make sure the parking garage is safe or uncrowded for visitors.

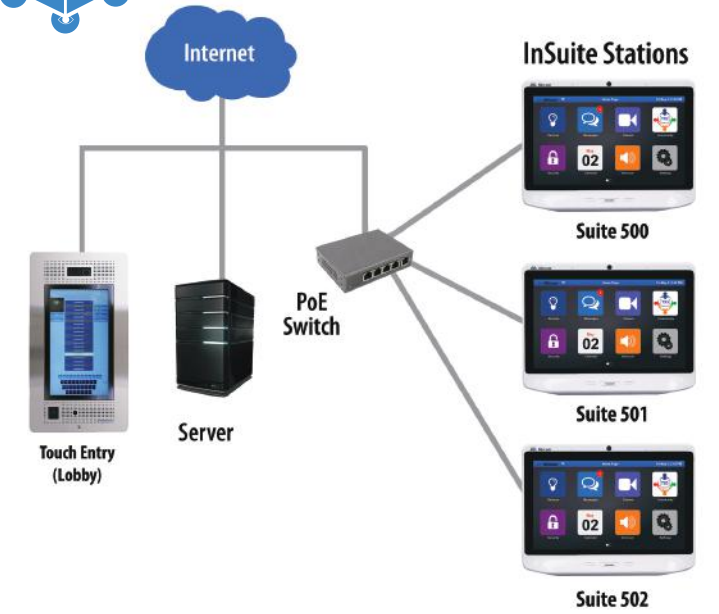

**TIME SAVER**  
Have a quick glance to ensure that you can swim in peace.

**PEACE OF MIND**  
Know that your children are safely on board.

## Unified Building Solution
