A highly cyber-secure solution that has successfully passed extensive penetration testing.

Revolutionize Remote Building Management with MiVISION

Experience complete freedom in property management with MiVISION — a revolutionary cloud-based solution crafted for building and property managers. Enhance building operations by granting property access or controlling permissions conveniently from a phone, tablet, or laptop, anytime, anywhere.

Stay Flexible with Seamless Tenant Management:

Add or remove tenants in seconds with our cloud-based admin security management solution.

Stay Connected:

Configure and monitor your systems across multiple locations remotely from a single browser window.

Stay Secure with Entry Log Review:

Conveniently review time and date-stamped entry logs for enhanced monitoring and security.

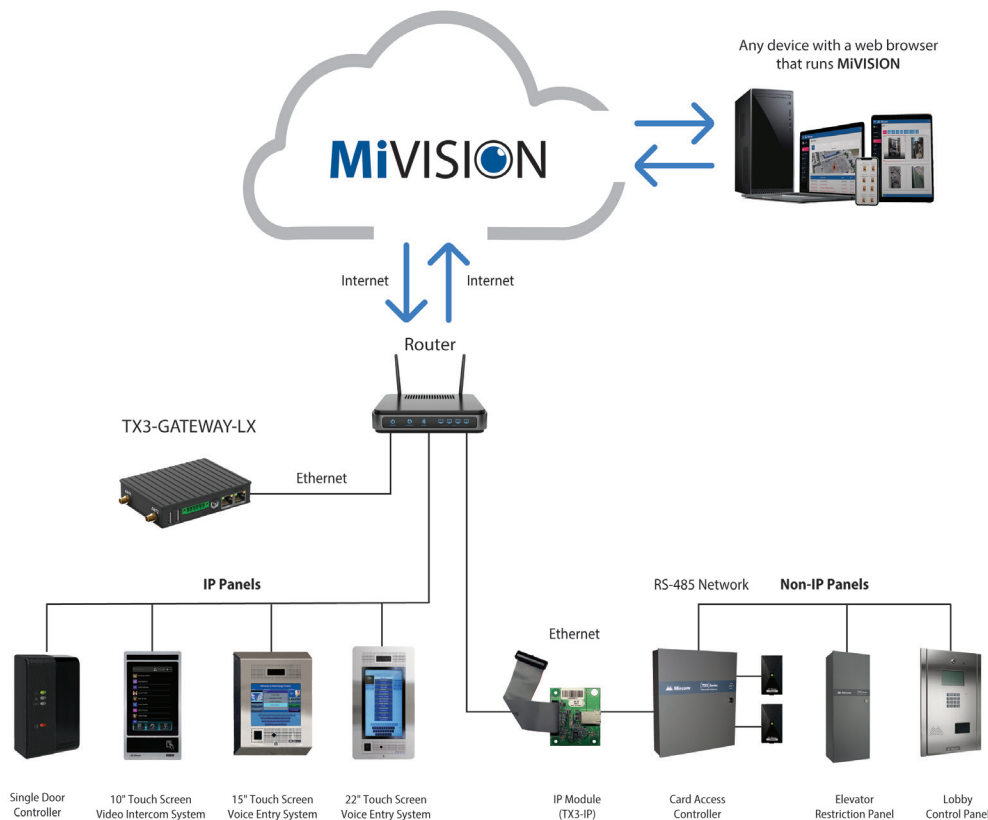

Stay Current with Comprehensive Property Analytics:

Gain insights into door entries, tenant usage, and feature adoption to facilitate informed decision-making about property management and personnel.

Stay Mobile with Cloud-Based Credential and Data Storage:

Store and back up your credentials, tenant list, and equipment configurations on the cloud. Save valuable time during on-site equipment changes with easy access to stored data.

How it works.

MiVISION is designed to enhance the installation and setup of access & security equipment in multi-family, commercial, and industrial properties. Whether it's for the main entrance, parking garages, key-fobbed elevators, or package deliveries, the MiVISION serves as a comprehensive turnkey solution.

The Future of Cloud-Based Configuration and Monitoring!

Installers & Developers:

- Utilize MiVISION as a universal platform to facilitate installation, configuration and service across multiple properties.
- Seamlessly push automatic firmware updates and equipment configurations from anywhere, at any time.
- Easily generate printable equipment logs for verification reports.
- Assign varying levels of control to concierges, service technicians, property managers, and security personnel.
- Visualize the building's equipment in 3D or per floor map for easy identification.

Property Managers:

- Manage tenant move-in move-out access permissions from a convenient Cloud Dashboard.
- Provide elevated security to the residents & offices with managed per-floor elevator access.
- Review who is entering your property with time and date-stamped logs recorded every time someone accesses the property.
- Manage and open doors and gates on the go.

Residents:

- Stay informed with building alert messages sent via email.
- Regain your access within seconds when access cards are lost or compromised.
