Series]**

## How it works.

## Elevate Your Building Management Experience with Mircom's TX3-VISION - The Future of Cloud-Based Configuration and Monitoring!

### CENTRALIZED MANAGEMENT

- Multiple site configuration management of TX3 systems on web browsers (desktop and mobile).
- Stay informed with real-time monitoring of user and panel events across all sites.

### ACCESS CONTROL SIMPLIFIED

- Manage people (residents) access and credentials effortlessly.
- Control and manage access levels with ease.
- All event notifications conveniently consolidated under one window.

### ADVANCED MONITORING CAPABILITIES

- Highly optimized solution for monitoring devices (TX3 Access Control, Voice Entry, Emergency Phones) and video sources (ExacQ).
- Event-driven video monitoring (Coming Soon).

### INTUITIVE INTERFACE

- Electronic map displaying multiple levels of a site (site, building, floor).
- Drag and drop devices, such as cameras and access points.
- Manual control for access points.

### FLEXIBLE CONFIGURATIONS AND ALERTS

- Manage holidays and scheduled access efficiently.
- Backup configurations to cloud storage.
- System status notifications for real-time updates.
- Send system alert messages to cell phones via emails or SMS messages.

### CLOUD STORAGE AND SUPPORT

- Store panel diagnostic data in cloud storage to aid technical support requests.
- Real-time charts for comprehensive data analysis.
- Provide server redundancy to minimize server downtime.

### USER-FRIENDLY AND CUSTOMIZABLE

- Multiple language selections (English and French) on web browsers.
- Limit user access to the system by assigning system access rights.
- Fully customizable home screen.

### REPORTING AND DOCUMENTATION

- Generate reports for chart analysis, event logs, residents, credentials, and panels.
