Why upgrade FX-2000 to FX-4000 Series
BENEFITS AND PERKS

Your Mircom fire alarm system is known for quality, reliability and flexibility. Our latest advancements can strengthen your overall life-safety program and enhance building operations.

Why do the key Stakeholders choose to upgrade to the Mircom's FX-4000 Series platform?

BUILDING OWNER:
Protect Your Investment

- Maintain compliance with industry standards and codes to ensure a safe environment.
- Minimize system disruptions or downtime compared to a new system installation.
- Avoid reliance on obsolete system components.
- Supercharge your existing systems with Mircom's advanced FX-4000 Series technology.
- Optimize system performance and minimize service costs.
- Expand your facility beyond your system's current capabilities.
- Optimize asset protection while minimizing operating expenses.
- Gain peace of mind with Mircom, your trusted partner in fire detection and alarm systems.

### SERVICE COMPANY:
Ensure Customer Safety & Loyalty

- Improve building system efficiency and operation, allowing quicker service work completion.
- Ensure compliance with the latest Building Code regulations.
- Cut down on fire system life cycle expenses.
- Gain access to the latest technology while preserving most of the existing system components and field devices.
- Reduce costs associated with replacement parts.
- Utilize new technology and multi-protocol support to retrofit and service sites more efficiently.
- Assist building owners with their evolving facility or campus needs.

OCCUPANT:
Reduce Disruptions & Downtime

- Avoid major site disruptions, false alarms or downtime.
- Experience peace of mind knowing that your building's fire alarm system is working properly.

When you have to upgrade existing life safety equipment, the prospect of installing an entirely new system can seem overwhelming and costly. That's why Mircom products are deliberately designed with backwards compatibility in mind. We will assess your existing system environment and provide an upgrade strategy that suits your needs and minimizes disruption to your operation.
