

PACKAGE DELIVERY SOLUTION

Easily grant couriers access to secure package delivery rooms

Mircom package delivery solution enables seamless and secure access for couriers through a two-step system:

1. **Mircom MiENTRY Mobile App**
2. **TX3 Touch Intercom System**

Solution Options:

Option 1: Direct Call Access

Courier Process:

- The courier uses the intercom panel to call the resident.

Resident Process:

- The resident receives the call on their MiENTRY app, even if they're away from home.

Access Management:

- For visitors, the resident presses 9 to open the door.
- For deliveries, pressing 6 can open both the main entrance and package room door (configurable setup).

Option 2: QR Code Access

Courier Process:

- The courier calls the resident via the intercom panel or phone.

Resident Process:

- The resident generates a QR code using the MiENTRY app and sends it to the courier.
- The code will be valid for 24 hours.

Access Management:

- The courier scans the QR code to the TX3 touch scanner, granting access to both the main entrance and the package room door (configurable on T10).

Benefits of Smartphone Package Delivery Solution:

Enhanced Convenience for Residents

- Residents manage package deliveries remotely, with easy access control via the MiENTRY app. This streamlines delivery processes, saving time and eliminating unnecessary interactions.

Increased Security

- Residents can verify couriers before granting entry, providing peace of mind and preventing unauthorized access.

Efficient Package Management

- Couriers can directly access a designated package room, minimizing the risk of misplaced packages and deliveries.

Adaptable, Future-Proof Technology

- QR code functionality and smartphone integration offer a modern solution adaptable to evolving digital trends, delivering long-term benefits for both residents and property managers.

Mircom MiENTRY Mobile App

This integrated solution makes package delivery secure, streamlined, and adaptable to future advancements.
